Summary

Full-stack software engineer with extensive hands-on experience who is open to both on-site and remote work. Developed and deployed several projects, including a Flickr clone and Airbnb clone. Skilled in managing and leading development teams, managing projects, and designing solutions. Meticulous file management, excellent communication, and team building experience. A highly motivated and detail-oriented individual with a passion for software engineering and development.

PROJECTS

ImageSpace

[Live Site](#) | [Github](#)

ImageSpace is a Flickr clone solo project made using a Python backend and a React frontend

- Created a beautiful four CRUD site from database schema to page styling/UX to production
- Full CRUD on Images and Comments, partial CRUD with Followers and Likes interacting with the RDBMS SQLAlchemy via Flask
- React frontend fully styled with CSS, Redux Store, state management, cookie storage

RentThisSpot

[Live Site](#) | [Github](#)

RentThisSpot is an AirBnB clone using an Express backend with a React frontend

- Utilizing a waterfall approach first with an Express backend, React frontend
- Designed and organized a database schema using SQLAlchemy
- Managed a redux store at the heart of the application

HandMade Haven

[Live Site](#) | [Github](#)

HandMade Haven is an Etsy clone made in collaboration with using a Flask backend with a React frontend

- Spearheaded the direction of the project and implemented an agile approach to features
- Managed and refactored queries to a built-from-the-ground-up API using Flask
- Led the search feature design and entire project CSS styling
